June 27,2017

TO: Vita Jasinauskaite

Or to WHOM IT MIGHT CONCERN

This it to certify, that I, Juris Tolpežņikovs today at Lietuvos mokinių neformaliojo švietimo centras, Vilnius, briefly examined two donkey stallions, which were showed me by Vita Jasinauskaite.

Bonis, 10 yo midsized donkey stallion, body score of 1/5. Severe deformation of right front and right hind hooves, back stiff 3/3. Xray exam reveals severe, long standing (more than 5 years) modeling of P1, P2 and P3 of both LF and LH, and moderate modeling of LH P1.

Valentinas, 7 yo small sized donkey stallion, body score 2/5. Flexure deformity of DIP joints. 1/3 of LF, 3/3 of RF.

To remain "pasture sound" both stallions need permanent veterinary care and orthopedic farriery care.

Juris Tolpežņikovs MagVetMed, LFHom

Attached photos of both stallions, both for ID and to highlight of clinical findings.

All the xrays are sent by email to Vita Jasinauskaite

VALENTINAS
